

How much waste does GC expect to reduce this year?

GC is collaborating with all parties to efficiently manage waste through a variety of projects in 2019.

Reduce plastic and other waste by

148,048*
kilograms

Reduce greenhouse gas emissions

by not directing waste to landfill about

343 tons

of carbon dioxide equivalents

Source: Emission Factor - TGO Carbon Footprint of Product Guideline 2018

Collecting nine types of waste:

PET, PE (Cloudy), PE (Clear), PE (Color), PP, Glass, Paper, Aluminum and Other
Recyclable Waste

The total waste collected is equivalent to

38,163
large trees

absorbing carbon dioxide annually

Source: Emission Factor - Care the Bear

* Except other recyclable materials collected from the PPP Plastic project as they use a different waste collection and separation method
